

SALMAN KHAN

DevOps Associate Engineer

Lahore, Punjab, Pakistan | cloudchamp0325@gmail.com | +92 3487587794

PROFESSIONAL SUMMARY

DevOps & Cloud Associate with hands-on, project-proven experience across Docker, Kubernetes, AWS, Terraform, Jenkins, GitHub Actions, Argo CD, Prometheus, and Grafana. Delivers automated CI/CD pipelines, containerized deployments, and GitOps workflows that measurably reduce deployment time and manual effort. Comfortable owning infrastructure end-to-end — from provisioning with Terraform to monitoring with Prometheus/Grafana — using Linux, Git, and cloud-native tooling. Looking for a DevOps Associate / Engineer role to keep building scalable, secure, and highly available infrastructure within a collaborative engineering team.

TECHNICAL SKILLS

Linux Administration: File Permissions, User Management, LVM
Orchestration: Docker, Kubernetes, Helm
Networking: VPC, Ingress, DNS, Load Balancing, SSH, SSL/TLS, Firewalls & Security Groups
Cloud Platforms: AWS (EC2, VPC, S3, IAM, ECR, ECS, EKS), Azure (VM, VNet, Blob Storage, Entra ID, AKS)

Version Control & Web Server: Git, GitHub, Nginx
Databases: MySQL, MongoDB
IaC & Automation: Terraform, Ansible, CI/CD (GitHub Actions, Jenkins, Argo CD)
Monitoring & Security: Prometheus, Grafana, Trivy, SonarQube, OWASP Dependency Check

PROFESSIONAL EXPERIENCE

DevOps Intern — Rhombix Technologies (Remote)

Nov 2025 - Feb 2026

- Owned CI/CD pipeline delivery using Jenkins and GitHub Actions for containerized application deployments.
- Deployed and managed containerized workloads on Docker and Kubernetes.
- Provisioned AWS infrastructure using Terraform and configured monitoring with Prometheus and Grafana.
- Partnered with the development team to standardize and automate deployment workflows.

DevOps Associate — Corvids Lab

- Took end-to-end ownership of an ERP-style automation tool for a USA-based client, replacing manual repetitive processes.
- Built a Python-based web scraping pipeline with scheduled cron jobs for automated lead generation.
- Integrated OCR for automated data extraction from documents and images.
- Developed backend APIs connecting scraped data to Pipedrive CRM, automating deal creation and closure.
- Delivered a fully automated lead-to-deal pipeline requiring zero manual intervention.

PROJECTS

Production-Grade Kubernetes Deployment with GitOps

- Containerized Node.js applications with Docker and deployed to Kubernetes using Deployments, Services, Ingress, and ConfigMaps.
- Implemented GitOps-based continuous deployment with Argo CD, reducing deployment time by 90% and improving deployment consistency.
- Followed Kubernetes best practices for scalable, production-ready deployments.

Kubernetes Monitoring with Prometheus & Grafana

- Implemented cluster and application monitoring with Grafana dashboards for CPU, memory, pod health, and node utilization.
- Configured Alertmanager for email notifications, improving observability and reducing issue-detection time.

End-to-End CI/CD Pipeline with Jenkins

- Built automated CI/CD pipelines with Jenkins, integrating Trivy, SonarQube, and OWASP Dependency Check for security and code quality gates.
- Automated Docker image build and deployment via Docker Compose, cutting manual deployment effort through automated build, test, and deploy stages.

Automated Lead Generation & Deal Management System (ERP-style CRM Automation)

- Built an automated Python pipeline that collects bid opportunities and extracts key details from solicitation PDFs into a clean, CRM-ready dataset.
- Designed a multi-stage pipeline (Fetch → Extract → Transform → Dedupe → Enrich) with deduplication logic and automated contact enrichment via Apollo.io, integrated with Pipedrive CRM.

CERTIFICATIONS

- Docker & Kubernetes — KodeKloud (Aug 2025 - Nov 2025)
- AWS Zero to Hero — Shubham Londhe (Jan 2026)

EDUCATION

Bachelor of Science in Computer Science

The University of Agriculture, Peshawar
