GitHub: 🔗 [github.com/salman0325](https://github.com/salman0325)

## Profile

DevOps Intern with hands-on experience in Docker, Kubernetes, and CI/CD pipelines. Skilled in deploying and automating containerized applications using GitOps practices. Proficient in infrastructure provisioning with Terraform on AWS and monitoring with Prometheus and Grafana. Seeking an entry-level DevOps role to contribute to scalable and production-ready systems.

## Education

### Bachelor of Computer Science

University of Agriculture peshawar

Expected Graduation: 2026| GPA: 3.5

## Skill

- Operating Systems: Linux, Red Hat, Windows
- Containerization: Docker, Docker Compose
- Orchestration: Kubernetes (Deployments, Services, Ingress, HPA, PV/PVC)
- CI/CD: Jenkins, GitHub Actions, Argo CD
- Cloud: AWS (EC2, VPC, S3, IAM, EKS)
- IaC: Terraform
- Monitoring: Prometheus, Grafana
- Version Control: Git, GitHub

## CERTIFICATION

|                                      |
|--------------------------------------|
| Docker & k8s                         |
| KodeKloud (Aug 2024 – Apr 2025)      |
| AWS Zero TO Hero from Shubham Iounda |
| (Sep 2025 – Oct 2025)                |

## EXPERIENCE

- DevOps Intern – Rhombix Technologies (Remote)  
Oct 2025 – Present
- Assisted in deploying and managing containerized applications using Docker and Kubernetes
  - Built CI/CD pipelines using Jenkins and GitHub Actions
  - Worked with Terraform to provision AWS infrastructure
  - Implemented basic monitoring dashboards using Prometheus and Grafana

## LANGUAGE

- pushto
- Urdu
- English

## PROJECTS

### project(1)

Production-Grade Full-Stack Application on Kubernetes

Tech: Docker, Kubernetes, Argo CD, GitHub Actions, AWS

- Containerized React, Node.js, and MongoDB services and deployed them on Kubernetes
  - Designed Kubernetes manifests (Deployments, Services, Ingress, ConfigMaps) following best practices
  - Implemented GitOps-based continuous deployment using Argo CD
  - Reduced manual deployment effort by 90% through automation
- 🔗 [https://github.com/salman0325/Jenkins\\_SharedLib-wender-list.git](https://github.com/salman0325/Jenkins_SharedLib-wender-list.git)
- 🔗 <https://github.com/salman0325/argocd-project-cd.git>

### project(2)

End-to-End CI/CD Pipeline with Jenkins & Security

Scanning

- Built Jenkins pipelines with automated build, test, and deployment stages
  - Integrated Trivy, OWASP Dependency Check, and SonarQube with Quality Gates
  - Automated Docker image creation and deployment using Docker-Compose
  - Improved deployment reliability and code quality enforcement

### Project (3)

Monitoring & Observability for Kubernetes Applications

- Implemented cluster and application monitoring using Prometheus and Grafana
  - Created dashboards for CPU, memory, pod health, and uptime metrics
  - Configured Alertmanager for email-based alerts
  - Improved system visibility and faster issue detection
- 🔗 <https://github.com/salman0325/observability-zero-to-hero.git>

### Project (4)

- NGINX, NGINX – Reverse Proxy & Load Balancer
  - Configured NGINX as a load balancer to optimize traffic across multiple servers.
  - Set up NGINX reverse proxy for a Node.js application
  - Improved performance and scalability
  - Ensured efficient resource utilization in a multi-server environment
